Outbound

# 14,533 potential customers in a dataset I built. To sell, I'd pick 100

100 right ones beat 10,000 emails.

Mohammed Nagieeb · @nagieeb

# The old way

Buy a list, send everyone the same message, and wait.

The result: few replies and a burned domain.

Mohammed Nagieeb · @nagieeb

# One question does the filtering

Who has this problem right now?

Not who might need us someday.

Mohammed Nagieeb · @nagieeb

# Signals tell you who

Hiring for a specific role. A new branch. Fresh funding.

Or inside ZATCA Wave 25, with until 1 February 2027.

# Enrichment is the real work

Who decides, what they use, what changed for them. That data makes a message personal without writing it by hand.

Mohammed Nagieeb · @nagieeb

# And the message is 3 lines

Line 1: what I noticed about you.

Line 2: this usually causes problem X.

Line 3: one question that's easy to answer.

Save this

# Pick your 100 in 4 steps

1. Write the problem in one line
2. Name 3 signals that it exists right now
3. Filter by signal, not by size
4. Know who decides before you write

Mohammed Nagieeb · @nagieeb

I'm Mohammed. I build products, and the machine that sells them, from Riyadh.

Save this, and tell me in the comments:
which signal do you filter on?

Mohammed Nagieeb · @nagieeb
