30-day plan

I built a ZATCA engine solo. It passed the production gateway

If I had 30 days to sell it, I wouldn't start with code.

Mohammed Nagieeb · @nagieeb

Why now

SAR 187,500

Wave 25 cut the threshold in half

Any business above this in taxable revenue in any year from 2022 to 2025
has to integrate its invoices by 1 February 2027.

Mohammed Nagieeb · @nagieeb

Week 1

Sit with accountants, not shop owners

My bet: the grocery owner isn't looking for invoicing software.
The accountant who keeps the books for many shops is.

Mohammed Nagieeb · @nagieeb

Week 2

Solve the most painful step only

Not a full POS.
The ZATCA integration, and an invoice that clears the first time.

Mohammed Nagieeb · @nagieeb

Weeks 3 and 4

10 real shops before any logo

Through one or two accountants.
If they don't pay, either the pain is too small or I'm solving the wrong part.

Mohammed Nagieeb · @nagieeb

Demand here has a date

ZATCA brings businesses in by waves, on published dates.

You don't need to create demand. You need to get there early.

Mohammed Nagieeb · @nagieeb

Save this

Before you write a line of code

1. Know who pays, not who uses it
2. Talk to 5 of them this week
3. Solve only the most painful step
4. Ask the first 10 for money

Mohammed Nagieeb · @nagieeb

I'm Mohammed. I build products, and the machine that sells them, from Riyadh.

Save this, and tell me in the comments:
would you start with the accountant or the shop owner?

Mohammed Nagieeb · @nagieeb
