From my week

1,103 installs at EGP 2.35 each

And we didn't make a new ad.

What happened

We had a UGC video that did better organically than anything else.

So I thought: why not put the money on that one?

31%

of installers actually signed up

That's the number I care about.

Installs alone only look good in a screenshot.

What I took from it

Don't invent an ad from scratch and bet on it.

Post a lot, let people tell you what grabs them, then pay for that.

The audience ran the A/B test for me

For free.

I just funded what they picked.

I'm Mohammed

I build ventures: the product and the machine that sells it

From idea to first paying customer.
I share everything I build here, with real numbers.
Building something? Follow along.
