GTM

42 hours

for a company to answer a lead from its website

Average among those that replied, in a Harvard Business Review study of 2,241 US companies. And 23% never answered.

Mohammed Nagieeb · @nagieeb

From my work

EGP 2.18

per Messenger conversation at Plstka

So every message left waiting is money already spent. The ad brought the customer to the door. The delay shuts it.

Mohammed Nagieeb · @nagieeb

The problem isn't the number of messages

It's how fast you reply.

Someone asking on WhatsApp wants an answer now, not tomorrow morning.

Mohammed Nagieeb · @nagieeb

So I've been thinking about an AI agent on WhatsApp

Not a bot with a button menu.
It understands the question, replies in the customer's dialect, and asks questions back.

Mohammed Nagieeb · @nagieeb

Its real job is triage

Serious or browsing? Budget? When do they need it? Do they decide?

Questions inside a normal chat, not a form.

Mohammed Nagieeb · @nagieeb

Then it hands off to a human

The ready buyer goes to a salesperson with a summary of the chat.

The AI opens the door and saves time. The salesperson closes.

Mohammed Nagieeb · @nagieeb

Save this

4 steps before you build a sales agent

1. Measure your reply time today
2. Write your 4 triage questions
3. Decide when it hands off to a human
4. Read 10 conversations every week

Mohammed Nagieeb · @nagieeb

I'm Mohammed. I build products, and the machine that sells them, from Riyadh.

Save this, and tell me in the comments:
how long does your team take to reply?
